With respect to claim 16, the prior art does not show a method of heating the memory foam above the transition temperature causing the shape memory foam to revert back to the permanent shape wherein the permanent shape has a density greater than the expanded configuration.

With respect to claim 24, the prior art does not show a method of heating the memory foam above a transition temperature causing the shape memory foam to revert back to the trained shape, wherein the trained shape has a density greater than the expanded configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
